Proyectos

Full stack web developer at Henry

I worked with a group of 8 people in Henry's final project, as a full stack developer in the creation of a web application for selling online courses.

- Using technologies such as React, Redux and Tailwind for the front end and node.js, Sequelize and PostgreSQL for the back end.
- I was mainly in charge of performing the user authentication through Firebase, as well as creating the components related to the administrator panel of the site.

Languages

- EF SET English Certificate (C1 Advanced)
